

30 October 2024

Delaware Valley High School
252 Rt 6 & 209
Milford, PA 18337

Dear Guidance Department:

Annually for the past twenty-four years, the Lehigh Valley Section of the Society of Women Engineers (SWE-LV) has awarded scholarships to top prospective students who identify as women graduating from area high schools who were enrolling in engineering at a college or university. Last year we awarded a total of \$18,000 to six recipients. Given the continued tremendous support of corporations and foundations in the area, SWE-LV will be awarding scholarships again this spring.

SWE was chartered in 1950. Since then, the Society has grown to nearly 20,000 members in more than 100 sections and 300 student sections. The Lehigh Valley Section is very active in the community and consists of approximately 70 members. For over 70 years, SWE has worked to support women in engineering and to encourage more women to enter or re-enter the engineering profession.

Scholarships of up to \$4,000 will be awarded to students who identify as women graduating from area high schools (areas with zip codes beginning 177 through 187 and 195-196, which includes over 20 counties in Pennsylvania) in 2025 and enrolling in an engineering program at a college or university in the summer or fall of 2025. The scholarship recipients are chosen every year based on academic achievement, extracurricular and leadership activities, an evaluation form, and an essay.

Applications for the scholarship can be found on our website. **All applications should be submitted electronically by 5pm on February 2, 2025.** Recipients will be notified by April 4, 2025.
