

Welcome FALL

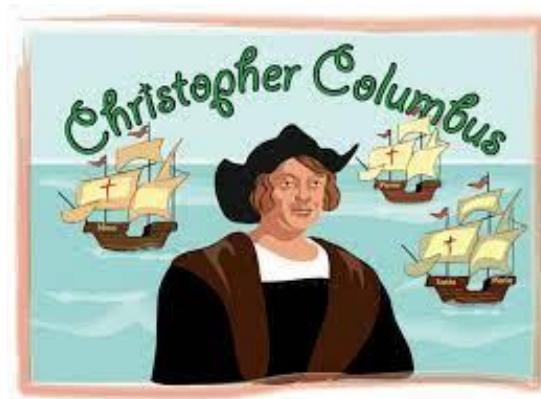

I want all the pumpkin pie
Every piece of candy will be mine
The sun will never shine
I like to climb the red trees
I want all the pumpkin pie
Every piece of candy will be mine
The sun will never shine
I like to climb the red trees
It is very fun

**It is very cold outside
I see the squirrels' climbing trees
I barely see any bees
I see everything is red and brown
All the leaves are fallen and dead
I wonder if every animal is fed
There are pumpkins everywhere**

Apples and acorns scattered on the ground
Rustling leaves making sound
I really want some pumpkin pie
Munching apples is very good
That makes me happy and that is said.

CHRISTOPHER COLUMBUS

By Ally Masone

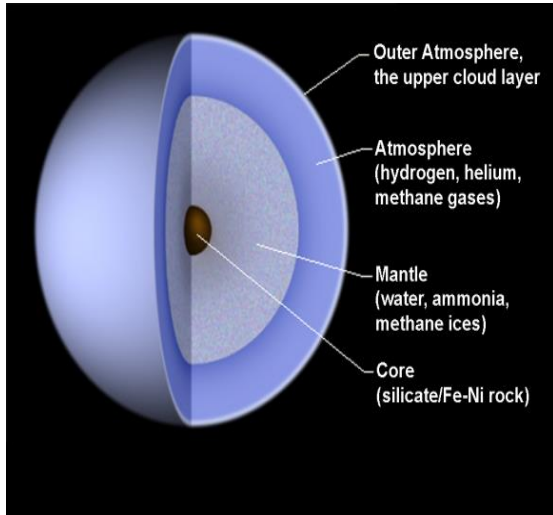

Christopher Columbus was an early explorer, who discovered and explored the Americas, however there were Native Americans living in the Americas.

Columbus was born in Italy in 1451. He later lived in Lisbon. He worked as a trader there. Columbus thought he could get to China and Southeast Asia, or the East Indies by sailing through the Atlantic Ocean. He was proved wrong. When he went through the Atlantic Ocean, he found what is now called the Americas.

Columbus was trying to get someone to pay for his journey to try to find a way to get to the East Indies. After many tries of getting people to pay, he convinced the king and queen of Spain to pay for it. He set sail on August 3rd, in 1492. He set sail with three ships, the Nina, the Pinta, and the Santa Maria.

Columbus made more voyages to explore the new land he found. He explored mainland America and more of the Caribbean. He had trouble being the local governor, and he was arrested for mistreating the colonists. Also, Columbus never knew he discovered America. He thought he was in the West Indies. He died on May 20th, 1506. He'll never know the major discovery he made.

Planet: Uranus

The many moons of Uranus- In the year 1986, the Voyager 2 Spacecraft traveled the deepest space mission yet! It was about to give NASA scientists the first ever close-up of Uranus! The spacecraft will uncover 10 new moons! A few are just a couple hundred miles away. Someday the moons might collide into each other. They are one of Uranus's many mysteries!

What is Uranus- Uranus is over 31,000 miles (50,000 kilometers) wide. Like Neptune, it's known as an ice giant. Half of Uranus is made up of swirling fluids and gasses. The temperatures there can drop as low as -371 degrees Fahrenheit, (-224 degrees Celsius) The ice giant gives off less heat than it could take in.

Fun fact- A stinky planet- Some of Uranus's atmosphere is made up of a gas called Hydrogen sulfide, The gas smells like rotten eggs!

There are 13 narrow rings going around the planet that can be quite hard to spot! The outer rings are brightly colored, the inner rings are dark and dusty. Uranus gets the bright color from all its methane gas in its atmosphere. It has no true surface. Its core is rocky and small.

How did Uranus form? - The solar system formed 4.6 billion years ago! Gravity pulled gas and a lot of space dust together to form the planets! Uranus orbits the sun on its side with one pole always facing away from the sun.

Selena Dolan

**WELCOME TO OUR
SCHOOL, MISS
MAURO!**

What grade do you teach?
“I teach 2nd grade.”

**When did you want to
start teaching?**

“I wanted to start

**teaching when I was 15 because of the early
childhood education classes at DVHS.”**

What degrees did you have to get to become a teacher?

“I have a dual certification for Pre-K to Fourth
grade and special education.”

Why did you want to teach at Delaware Valley School District?

“I wanted to teach at DVSD because I
went to the old DVES, and it inspired me to
teach here at the new DVES”

**This is all about an amazing 2nd grade teacher, MISS
MAURO!!!**

BATS

By Ariel Ostrout

Bats use echolocation to find their food and homes. Many people find bats scary, weird, and haunted. Some people also think vampires turn into bats in the morning. There are over 1400 species of bats have been on Earth for 65-100 million years. Bats wings are made of the same bone in our fingers. Bats are native to Americas, Europe, Africa, Asia, and Australia.

Interesting Facts about Bats

Some bats weigh less than a penny.

Bats sleep upside down.

Bats are flying mammals.

Bats eat when flying.

Bats lose teeth like us, and they grow them back.

Bats can live with no water for 24 hours or longer.

2022-2023 DVES Student Council Representatives

Back Row: L-R: Jovey Thiel and Rayvon Carr

Front Row: L-R: Jodie Harrison, Maeve Kaiser, Gia Cosentino, Miabella Paradiso, and Adelyn Gamer

Congratulations!

The Importance of Hello

by the Ariel, Anna, and Patrick

Mr. Adelfio and Mrs. Zito

The importance of Hello is to make people feel included, it spreads kindness and can brighten someone's day!

Riddles of the Month by Sekai

Question One: What comes up, but never goes down? Your age

Question Two: If you drop me, I will crack but if you smile at me I'll smile back? A mirror

WELCOME MRS. SABO TO OUR SCHOOL! :)

WE ARE GLAD TO HAVE YOU AT DVES. WE KNOW YOU WILL DO GREAT THINGS!

MRS. SABO IS A SECOND-GRADE TEACHER. SHE HAS A PRE-K TO 4TH GRADE CERTIFICATION AND HER MASTERS. IN SPECIAL EDUCATION. THIS IS HER FIRST-YEAR TEACHING. SHE DECIDED TO BECOME A TEACHER IN HIGH SCHOOL

Welcome to OUR School!

MR. John

1. When did you start teaching?

“I started teaching last year.”

2. What do you teach?

“I teach vision and Braille.”

3. Why did you decide to start teaching Braille and vision?

“I teach Braille and vision because I saw someone struggling, and no one was helping him. It encouraged me to start teaching vision.”

By Eleanor Bellomo

All about HALLOWEEN!! By Scarlett

Halloween is a very fun and special holiday because you can dress up in any costume your heart desires. For example, I

am going to be Mike Wasawski and my friend is going to be Sully from the movie, *Monster Inc.* It is fun to match costumes with your friends or family!

Halloween started over 2,000 years ago!

An ancient Celtic celebration in Ireland and Scotland called Samhain. Samhain marked the end of summer. People at the time were frightened of evil spirits. They would dress up in costumes and make noise in the streets to make the spirits go away.

What is a hurricane? By Connor

How is a hurricane formed?

When warm moist air over water begins to rise. The middle of the hurricane is called the eye.

Hurricanes are scored on a scale based on how powerful they are with F1 being the weakest and F5 being the strongest.

Black Cats by Ally

Black cats are considered bad luck around Halloween. People say that if a black cat crosses your path around Halloween, you will have bad luck. Black cats are believed to be witches' sidekicks. It's also believed that witches would transform into black cats. In other parts of the world, black cats are considered good luck in Ireland and Japan. In Spain black cats are considered to curse or bad luck to anyone they come near or encounter, but I love black cats.

Seals

By Anna Gallagher

I think that seals are very cool, seals help maintain a balance in the food web. Seals consume fish and squid. Seals are also important food source for larger predators, like polar bears and sharks.

Seals are well adapted to cold polar environments like Antarctica, Alaska, and some in Iceland. Most seals also have a layer of fur, giving additional insulation on land, their blubber keeps them warm in extremely cold temperatures. They have at least two layers of fluff, and an outer layer of fluff with dark furs, and an inner, down-like layer of underfur, referred to as “Guard furs.” The outer furs keep the inner layer warm and dry; they have a structure that helps them stick together, seal in air and heat.

[Learn more, watch the seal video](https://www.youtube.com/watch?v=uiSN_fORzyg)

Happy Fall by Ariel

Every autumn in Oregon traveling down Route 18 receives a “beaming” smile from the hills. The

Hampton Lumber Company created the design with a mix of Douglas fir and Larch trees when they reforested the area. Larch trees are conifers with needles that turn yellow in the Fall. The smiley face is surrounded by Douglas Firs, so it stands out like an emoji.

I think a smiley face made of trees is a great thing. It can make people happy for fall and inspire people who want to save trees and the environment. A tree smiley face makes me happy.

Odyssey of the Mind

By Sekai

Odyssey of the Mind aka O.M. is a real cool after school activity. At our school you can start doing O.M. in second grade. It's all about creativity and problem solving. In the club you come up with a seven-minute play. You make costumes, sets, and scripts. There are different competitions you go to like districts, states, nationals, and worlds. You can meet people from all around the world, last year Ms. Casey's team were eleventh in the world. The club mascot is a little racoon named Omer the Romer. I am on Mrs. Curtis's team. It's fun, you should join!

Mr. M by Scarlett and Eleanor

How is it being a substitute teacher?

“It's the most rewarding job I've ever had.”

When did you start subbing at DVSD?

“September 2021”

Why did you become a sub?

“I became a sub because I enjoyed school when I was younger. I also enjoy teaching and learning from my students.”

What grades do you teach?

“I teach K-12.”

Come to a DVES Concert

Our amazing Second Graders will be performing our first concert of the school year on November 10th at 6:30! Please mark your calendars and come out to support our amazing students next month!

Thank you!
Alissa Selfridge

DVE-TV Crew 2022-2023 by Ally

Ms. Emily Kress, a journalist with WNEP, was invited to come to the Delaware Valley Elementary School. She introduced the reporters to the world of journalism. Photo/caption by Mrs. Snure

DV-TV is a fun news program that may participate in 5th grade. You arrive at school at 8 a.m. which is an hour before school starts. When you get to the newsroom, you get to see your job which basically explains you what you'll be writing about for the program. You type a couple paragraphs on your topic then around 9:05AM Mrs. Snure will record the show. The news reporters read what they wrote about, and it gets streamed live, so the classrooms view it on their smart boards each day.

If you are in DVE-TV, you will also go on interesting day trips to interview exciting people and see cool places.

I hope your excited to see our news program this year!

By Angelo Ciarelli

All about Cheetahs

Cheetahs have three stages in their life cycle. Cub to (birth to 18 months) then there is adolescence (18 to 24 months) Then there is adult (24 months up) Cheetahs have excellent eyesight, which helps them find their prey. Cheetahs are the fastest land animal. A Cheetah's life span is 14 years. I LOVE Cheetahs. I hope you do!!

Book Review: [Finding Gobi](#) by Eleanor

Finding Gobi is an emotional book. My favorite part about the book is that it was based on a true story. My favorite part is when Dion was sneaking Gobi in the hotel. He dropped his bag, and everything fell out,

and I didn't realize that the bag that fell was the one with all his stuff in it, not the one with Gobi. I got scared when they found out that Dion was sneaking Gobi in the hotel. I loved the book. Read to find out what happens!

#FindingGobi

Gobi, Dion, and Lucja were at Our School!

By Scarlett

First, Dion threw a ball for Gobi to catch, and it was cute. Next, He showed us where he grew up, and it was in Australia, cool! Dion explained that Australia has dangerous animals like the Boxfish, tiger snake, funnel web spider and interesting animals like koalas, kangaroos, and dingoes. Mr. Leonard also spoke about his 155-mile ultra-marathon race he ran with Gobi and his other challenging races. He describes his heavy his running supply bag and sleeping in tents during his long-distance races.

The Gobi videos were so adorable especially when he asked us "How many tricks do you think Gobi can do?" Some people said 15,5,9,1 or 2, but then Dion showed us a video of him asking Gobi to "Sit, roll over, backflip, and somersault." But Gobi just stared at Dion and didn't do anything, it was funny. I loved assembly!

Favorite Halloween CANDY by Ally and Ariel

What's your favorite Halloween candy?

Ms. Atchison: Wax Lips

Mrs. Navitsky: Twix/ Kit Kats

Mrs. Slain: Reese's Cups

Mrs. Thompson: Reese's Cup

Mrs. Zito: Reese's Cups

Mr. M: Milky Way

Ms. Bailor: Mounds

Ms. Casey: Reese's Cups

Mrs. Curtis: Hershey's Chocolate

Ms. Moglia: Skittles

Mr. Mang: Hershey's Chocolate or Reese's

Mrs. Phillips: Mounds

Mrs. Genevise: Twix

Mrs. Fean: Take 5

Mrs. Stewart: Snickers

Mrs. Lawson: Reese's Cups

Welcome to DV&S Ms. Schwab! By Aubrianna

Ms. Schwab decided that she wanted to be a teacher in high school because it is a rewarding career. She has bachelor's degree in special education. She enjoys working with kids and says, "it's great to see students' skills improve as they grow."

Hocus Pocus by Patrick

Hocus Pocus One or Two? I thought that Hocus Pocus Two was better because most of the same characters from the original Hocus Pocus. The witches that were reincarnated again by three

teenagers like in the original Hocus Pocus. Hocus Pocus Two had the witches that played the Sanderson sisters in the first Hocus Pocus, and it had the book from the first Hocus Pocus. Billy Butcherson is still the zombie, but the teenagers and Mother Witch are new characters.

I would rate it 10 out of 10. There are new characters like the mother witch. Fun Fact: Hocus Pocus Two was filmed in Rhode Island, but the first Hocus Pocus it was in Salem

PTA Fun Events

September: Walkathon

**The Walkathon raised over a \$1,000 for
Pike County Humane Society!**

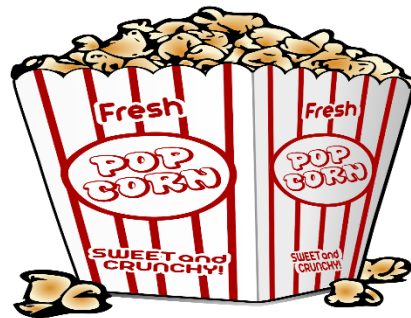

October: Trunk or Treat

Popcorn Day

Popcorn day Is back at DVES this school year, YAY! Sadly, it was canceled it because of the Coronavirus, but now you can buy a ticket for before class for \$0.50 for a bag served by the PTA during your lunch. Do you like popcorn? I know I do!

Looking Forward to a fabulous school full of good times at DVES!

Pen & Pages

By, Stephon Petrakian, Bella Paradiso, Gia Cosentino, Kai Gara, Izabelle Millan, and Clara Clarke

Pens & Pages is about books and writing. There are snacks too (no pickles though). You get to read and write about books and other fun stuff. When we write, we get to write about our thoughts and feelings. Pens & Pages is also a great opportunity to make new friends because there are a lot of great people in the club! The teacher (Mrs. Phillips) is nice and she always makes you want to learn more stuff every time you come into her room. She'll always listen to you, and she'll help you a lot like when you're reading and need help with a big word.

Tigers by Isabella

As the largest member of the cat family, Tigers are strong, powerful and one of nature's most feared predators. Silent hunters make one meal a day! Their beautiful orange and black striped coats provide camouflage when hunting pray at night, when they can reach speed of 65 km/hr. (40 mph) Tigers have been around for many years, but tigers are endangered.

Read about young people saving tigers!

https://tigers.panda.org/news_and_stories/stories/5_incredible_ways_young_people_are_saving_tigers/
