Today's Weather:

Partly Sunny

90°/71°

WHAT'S NEW

Be sure to take all personally owned band instruments and music home today. You must have a contract to take school owned band instruments home, if you didn't fill out a 2018-2019 contract you cannot take the instrument home for the summer. See Mr. Bullock if you have any questions.

The results of Mrs. Oszczepinski's annual Paper Airplane contest are--Izzy Berrios for distance; Lea Traktman for accuracy; Owen Henry tied for flight AND THE OVERALL WINNER of the \$25 gift card to Flagship Cinemas is.... Eric Cabrera-Agostini . Please come to Mrs. O's room sometime today to pick up your prize.

Any student who still has medication in the nurses office must have a parent pick it up by tomorrow. No medication will be sent home with students with the exception of asthma inhalers or Epi Pens. Any medication that is not collected by a parent will be discarded.

DON'T FORGET

Any student taking AP Physics 1 next year should see Mr. Curtis for a book and summer work.

Any student who has AP and/or SAT Prep books, may be able to donate them to their teacher before the end of this school year for the new DVHS Learning Commons next year for other students to use.

Any student planning on taking AP World History next year can begin picking up their summer work packets from Mr. Gonzalez, Guzenski or Bailer's rooms.

Attention students taking AP Statistics next school year: Report to A-9 to pick up summer work.

TODAY IN HISTORY

In 1979, 32 solar panels on the White House roof, installed by the Carter administration, were dedicated. President Carter wished to demonstrate a commitment to renewable energy use, as a model for the nation. About 3m x 1m x 10cm deep, the dark surfaces of the panels absorbed energy from sunlight, heating water passing through pipes snaking below them. Carter stated, "In the year 2000 this solar water heater behind me, which is being dedicated today, will still be here supplying cheap, efficient energy." That was not to be. The subsequent Republican President, Ronald Reagan, with one of the worst environmental records of any president, while the roof was being resurfaced in 1986, had them removed and sent to warehouse storage. In the same year he slashed the research and development budget for renewable energy, and eliminated tax breaks for wind turbines and solar projects.
